

# THE INSIDER ISSUE

Cult labels on our hit list - wear them before everyone else

## WHAT

### 1. PEEL

Combat pigmentation, ageing and dull skin with The Sloane Clinic's Luminizing Peel. This gentle exfoliating three-day peeling system simultaneously improves your skin texture, significantly lightens dark spots (due to melasma, sun exposure, acne scars and other discoloration) and boosts luminosity. Your skin will appear smoother, brighter and more rejuvenated days after this treatment.

### 2. REVITALISE

Looking unattractive is often the result of multiple beauty woes ranging from dark spots to sagging skin. That's why modern women demand treatments that target more than one skin concern. Nova 3R is a multi-tasking Swiss technology that utilises triple wavelengths of light energies to deliver three beauty fixes in a single session. Infrared light stimulates natural collagen production to tighten and lift sagging skin. Intense Pulsed Photofacial clarifies skin, lightens pigmentation and brightens dull complexion. Photobiomodulation light revitalises skin, giving it a youthful glow and luminescence. The end result: a radiant and revitalised complexion.

### 3. LIFT

Enjoy a lunchtime facelift without going under the knife with Restylane Hydrolift. Touted as the "liquid lift" for the discerning, this innovative treatment replenishes skin's natural hyaluronic acid, which invariably depletes with age. FDA-approved hyaluronic acid fillers are carefully administered in tiny injections to lift your skin, restoring facial suppleness and giving you more defined facial contours instantly. So, if you fancy a luminous glow and plumper, smoother-looking skin, look no further. These facial enhancements continue to improve over time as the hyaluronic acid in Restylane Hydrolift also stimulates skin to produce collagen, enhancing your results over time. The end result: gorgeous lifted skin.

Except for Nova 3R, which is only available at The Sloane Clinic at CitySphere, all other treatments can be done at all outlets.

## get glowing skin

You too can have that gorgeous Hollywood radiance. Here's how, in three easy steps.

### 1. PEEL
