

BEAUTY WOE: A LESS THAN FAVORABLE NOVA 3R

THE TREATMENT: EVOLVENCILLER

back to normal?"
The Issue According to Lim, the most common difference could be seen from her skin. "My skin looked much better after the procedure," she says. "The doctor showed me the before and after photos of my forehead and side profile, and I could see that from the front, my skin looked much smoother after the procedure. My skin is more prominent now, which shows the white, dry tip of my nose is higher and more thin. I never stop for a side view profile."
The Results Dr. Lim says that the Evolencer laser also helped with the uneven skin tone and redness around her eyes.

...so it wouldn't hurt at all. Treatment was the snapping, several and on the intense light pulses even with your eyes closed and protected. At most, it felt like a warm shower of sparklers raining on your face, with a slight burning scent that came from my facial hairs being laser-ed off."
The Results "My face was slightly red right after the treatment, but after a couple of days, I could feel that my face was smoother. And my friends also noticed that my face looked more radiant. I looked and felt like I just had a good facial," says Lim.
Also Ideal For Treating the chest, tummy, hands and thighs. "In fact, it is excellent for helping to lighten stretch marks and to firm up the skin. In these areas as well," says Dr. Low. "The procedure can also be used to even out skin discoloration or sun damage on areas such as the chest and

THE TREATMENT: NOVA3R

The Patient Joan Lim, 35, senior art director
The Consult Dr Low Chai Ling, aesthetic physician
The Place Sloane Clinic, #03-01 Caltex House, 6523-2522
The Cost From \$1,100.
The Fears Pain, pain and more pain.
The Procedure The Nova 3R is a 3-in-1 procedure that uses three types of light technology at one go, allowing the heat and light energies to penetrate deep into the skin's collagen layers. "Traditional aesthetic treatments like IPL or Titan, offer only one type of light and limited benefits; this one treatment includes them all — infra-red, IPL and photobiomodulation —so patients get triple the benefits in one quick, painless session," Low explains.
The Ouch Factor "Actually, it wasn't as bad as I had thought it to be," says Lim. "I insisted on the application of the numbing

cream so it wouldn't hurt at all. You could hear the snapping sound and see the intense light pulses even with your eyes closed and protected. At most, it felt like a warm shower of sparklers raining on your face, with a slight burning scent that came from my facial hairs being laser-ed off."
The Results "My face was slightly red right after the treatment, but after a couple of days, I could feel that my face was smoother. And my friends also noticed that my face looked more radiant. I looked and felt like I just had a good facial," says Lim.
Also Ideal For Treating the chest, tummy, hands and thighs. "In fact, it is excellent for helping to lighten stretch marks and to firm up the skin in these areas as well," says Dr. Low. "The procedure can also be used to even out skin discoloration or sun damage on areas such as the chest and
