

THE SLOANE CLINIC FEATURE

Youthful Essence

THERE ARE MANY SECRETS TO a more radiant complexion – one of the best-kept ones is natural hyaluronic acid for skin brightening in a therapy called Revitalift. Hyaluronic acid, a naturally present component in the skin, helps the skin to maintain its water balance, vitality and resilience. It also creates the best environment for cellular activity and the replenishment of collagen, elastin and more hyaluronic acid. However, for most people, the hyaluronic acid found deep in the skin progressively depletes as they age, especially past the mid-20s. This causes the skin to look dull, dehydrated and rough. Fine lines will also form and the complexion loses its natural glow and youthful plumpness. Dark eye circles also begin to form.

If you feel that ageing skin is catching up with you, fear not, as the experts at The Sloane Clinic are here to help with its Revitalift treatment. Through microinjections of hyaluronic acid, your skin's own store is replenished and maintained, restoring youthfulness quickly from within.

No matter your age, Revitalift is highly effective at resuscitating a lacklustre and dehydrated complexion by increasing moisture retention, which strengthens your skin's firmness and resilience. The fine particle size and excellent absorption of the bio-identical molecule also makes it ideal for rejuvenation of areas with sensitive or thin skin, especially under the eyes, neck and even the hands.

Over the next one week after the treatment, you can expect a smoother, more well-toned, hydrated and brightened skin. With bio-revitalization of the skin over a few weeks, you will gradually see the rejuvenation of your complexion, enhancement of your skin tone and elasticity. Revitalift is especially popular in the undereye area as it can help lighten dark eye circles, giving you a refreshed appearance. A primary course of Revitalift of six sessions done at two- to four-week intervals is usually recommended for long-lasting results. It is suitable for all skin types, and is simple, fast, and relatively painless with no downtime. With "skin-vestments" like the Revitalift, age, stress and dark eye circles may no longer be our most dreaded enemies.

The Sloane Clinic is a chain of aesthetic clinics offering total beauty solutions from cosmetic surgery to non-invasive aesthetics in Singapore and Malaysia.
